NPO = Palesa Pads

Research & Planning

1) Organization Overview

- Name: Palesa Pads
- Palesa Pads produces best-quality, reusable cotton sanitary pads manufactured in South Africa. They benefit women by reducing exposure to toxic chemicals and helping to ease menstrual cramps. Palesa Pads is a foundation that partners with sponsors to assist less fortunate young adults who cannot afford to buy sanitary pads. They partner with schools to give girl students free packages of reusable pads and cleaning products. Their pads are comfortable, can be worn for extended periods with no odor, lessen menstrual cramps, are heat-free, and easy to wash.

Mission & Vision Statement

- Provide leak-carefree-to-wash products. Available in 5 unusual sizes, comfortable to wear, and catering for all kinds of flow types: Face Mini, Midi, Maxi, Mega, Mama Pads.

Target Audience

- Young schoolchildren in underserved communities who cannot afford to buy sanitary pads, as well as women looking for suitable, breathable, cost-effective, soft, chemical-free sanitary pads. The pads can be used for 5 years and provide an easy solution.

2) Website Goals & Objectives

- The main goal for the Palesa Pads website is to focus on promoting, distributing, and selling good-quality reusable sanitary pads to help address period poverty.

Key Performance Indicators (KPIs)

- Educating users: Highlight on how to use the product and the purpose behind it.
- Education and awareness: Teach the public about the benefits of the product and help change the stigma around periods.
- Empowering: Claim the Red Revolution – empower women by educating them on the benefits and driving change.

3. Current Website Analysis

- Weaknesses:

Gather more feedback from girl students on the website, not just from paying customers.

- State all the schools the company has helped.
- Strengths:
 - Has good and adequate information.
 - Website is colorful and clear.
 - Easy to navigate. Good layout on pricing.
- Areas of improvement:
 - Difficulty of use after 5 years of use.
 - Include videos on the website to assist people who need more understanding of the product.

4. Proposed Website Features & Functionality

- Homepage: Clean, with a logo that indicates the brand name.
- About Us: Detailed information about the brand, including in-depth details about the materials used.
- Contact page: All contact details listed, including operating hours, sponsor information, and address.
- Product page: Details about the product are provided, including how it functions, along with four banners for shopping and pricing.

5. Design & User Experience

- The website is bright and user-friendly, with a welcoming style that captures the user's attention. It has a fun and visually engaging design.
- Pleasing aesthetics that are welcoming and encourage users to purchase merchandise.

Color Scheme

- White, blue, and pink.
- White (#FFFFFF): Most backgrounds are white to create a pop of color for the text.
- Blue (#03AFD2): Used for website icon backgrounds and client feedback backgrounds.
- Pink (#FF3E9B): Background on the logo is pink; used to highlight buttons.
- These colors represent the branding and vibrancy of the website, making the user feel free-spirited and more intuitive.

Typography

- Heading: Bold text.
- Subheadings: Small to medium text.
- Body text: Old style text.

- This creates a clean and modern look. The website may have vibrant colors, but the fonts are clean and suitable.

Layout & Design

- Hero banner on a clean and simple homepage.
- Useful product images.
- Easy to navigate to the needed product.
- Use WhatsApp or landline contact button to get information, and a sales or info email for product specials.
- Friendly design for users with different smart devices.
- Instagram, Facebook, X, and YouTube buttons to place orders.

- Low-fidelity workflows

.
